Curtiss-Wright Aerospace Actuation Division

- Modern 186,000 square foot facility located in Shelby, North Carolina
- 3 shifts powered by a team of approximately 300 highly skilled employees
- Design Engineering, OEM Manufacturing and FAA certified repair station (MRO) housed together under one roof

The combination of innovation, manufacturing strength and certified repair services deliver high-performance, precision-engineered actuation solutions trusted across global aerospace and defense markets.

Formed from the merger of companies founded by Glenn Curtiss and the Wright brothers in 1929, Curtiss-Wright continues to be an industry leader in the manufacture, repair and overhaul of electro-mechanical flight control components.
